### General information

Facility name and location

### System parameters

System thermal capacity, Gcal/h

System thermal capacity, kW

System design volume, L

System static pressure, bar

Maximum working pressure, m H<sub>2</sub>O

Safety valve set pressure, m H<sub>2</sub>O

District-heating return line pressure, m H<sub>2</sub>O

**Heat carrier and operating mode****Heat carrier type**

water glycol solution, %

**System temperature schedule (supply T1 / return T2), °C**

/

Number of pumps

**Filling system**

no yes yes, within 5 hours per MOEK requirement

**System type**

heating ventilation other

**Doorway size limit (height × width), m**

height width

Additional information

Important! Profit LLC accepts no responsibility for the accuracy of the source data provided in this questionnaire for equipment selection.

If the customer declines to complete this questionnaire, this is deemed acceptance of all technical characteristics defined by the type designation stated in the order in accordance with the ANHEL® catalogue, and confirmation that the product requires no additional features.
