General information

Water supply source (a raw-water analysis report must be attached to this questionnaire)

Raw water temperature (min, max), °C

Treated-water quality requirements (attach the requirements or a reference to the applicable standard)

Inlet flow rate at the supply network connection point, m³/h

Inlet pressure at the supply network connection point, m H₂O

Inlet pump type (if any)

Treated-water flow demand

Daily, m³/day

Peak hourly, m³/h

Water consumption schedule (to choose the optimal operating scheme)**Number of shifts**

Shift duration

Break between shifts (max)

Unit operating mode

Treated-water buffer storage required (tank capacity – V, m³)

Existing treated-water tank capacity, m³

Required outlet head, m H₂O

Network for backwash discharge — available?

Quality restrictions on the discharged backwash water

Composition limits

Volume limits

Scope of project documentation to be supplied with the unit

Additional information

Important! Profit LLC accepts no responsibility for the accuracy of the source data provided in this questionnaire for equipment selection.

If the customer declines to complete this questionnaire, this is deemed acceptance of all technical characteristics defined by the type designation stated in the order in accordance with the ANHEL® catalogue, and confirmation that the product requires no additional features.
